

Research Assistant

QualTek is seeking a qualified individual who can assume a full time Research Assistant role in our Newtown, PA facility. The ideal candidate takes pride in all they do, is well organized, pays attention to detail and can manage more than one task at a time. Applicant should also have good communication and computer skills (PC). Willingness to work hard, meet deadlines and stay on top of all projects, duties, and responsibilities is crucial. QualTek is a small company that prides itself on teamwork, and good interpersonal skills are a must. Ability to work well independently and in a group setting is also very important.

Principal Duties and Responsibilities:

General laboratory duties including immunohistochemistry (IHC) staining of tissue samples, cover slipping microscope slides; the formulation, preparation, and QC of reagents; labeling, storage, and refilling lab supplies. Will be responsible for lab organization, filing slides and documentation, aiding in shipping/receiving of lab materials, may include maintenance tasks (sweeping, general cleaning, and trash removal). Will assist Project Managers and other personnel with appropriate tasks for sponsor contracted projects including laboratory, quality and administrative duties.

Qualifications:

- B.S. or A.S. in a scientific discipline
- Newly graduated applicants who have had coursework that included laboratory experience will be considered
- Familiarity with general laboratory equipment such as microscopes, centrifuges, pipettes etc. is necessary
- Excellent lab technique and adherence to safety protocols is expected
- Immunohistochemistry, RNA Scope, histology or accessioning experience is a plus
- Willing to work hard, go above and beyond what is requested, must have some flexibility in schedule
- Meticulous attention to detail and ability to focus, prioritize, and multitask
- PC knowledge & Windows OS experience is a must
- Good listening, oral and written communication skills
- Must have strong interpersonal and organizational skills
- Able to legally perform duties within the United States without restrictions
- No disqualifications for employment in the US lab industry as determined by the Federal Government

A cover letter is required with your resume. We want to evaluate your writing skills and style and understand how you as a candidate will fit in with our growing organization. If your experience is in a related field, please explain how you feel your skills can be beneficial for this position. Salary history and references will be required for the successful candidate and will be requested during the interview process.

Company Background

QualTek Molecular Laboratories is a contract research biomedical laboratory that works with major pharmaceutical, biotech companies, and academic research departments in the areas of oncology, inflammatory diseases, as well as other disease states. QualTek's expertise in IHC, a

method of visualizing and localizing proteins in tissues, has uses in most areas of biomedical research from basic R&D through clinical trials and advanced patient screening to commercial product inception. We are at the forefront of the effort assisting our customers (study sponsors) in identifying new biomarkers for disease diagnosis, disease detection and treatment.

No calls will be accepted regarding this position. There will be no auto reply to applications sent; if you are selected to be interviewed you will be contacted via phone or email.
